SENIOR SOFTWARE DEVELOPER

Seeking a challenging Frontend Developer role within software engineering to leverage expertise in developing innovative and user centric web applications. Committed to contributing to a dynamic and collaborative environment, prioritizing creativity, technical excellence, and continuous learning.

SKILLS

Languages :- Typescript, Javascript, HTML/CSS, NoSQL, SQL

Technologies & Tools :- ReactJs, React-Native, Codex, Claude, Gemini, Agentic coding, Node.js, Express.js, Next.js, Firebase, MongoDB, Redux, NX, Netlify, Nunjucks & Git

PROFESSIONAL EXPERIENCE

ZenTrades.ai

May 2025 - Present

Founding Frontend Engineer

- Leading a complete frontend rewrite of the core CRM/ERP platform in close collaboration with the Product and Design teams, leveraging modern AI tools such as Claude, Codex, and Gemini to accelerate development and improve code quality.
- Maintaining and enhancing the user experience of the company's CRM platform by delivering new features, improving usability, and resolving performance bottlenecks.

Unico Connect

May 2024 - April 2025

Frontend Lead

- Leading the frontend development team in designing, developing, and implementing scalable and responsive web applications, ensuring optimal performance and user experience across multiple devices.
- Collaborating with stakeholders to define project requirements, technical specifications, and development milestones, ensuring alignment with business objectives and user needs.
- Implementing best practices and coding standards to maintain code quality, readability, and maintainability, contributing to a robust and scalable codebase.
- Conducting code reviews, providing constructive feedbacks to team members, and mentoring junior developers, fostering a culture of continuous learning and improvement.
- Successfully scaled existing systems to accommodate evolving project requirements, resulting in improved performance and reliability
- Reduced development me by 3x by refining the project's architecture and optimizing development processes.

CashBook App (YC W21)

Jan 2022 - May 2024

Software Developer

- Developed and maintained web and mobile applications using React and React Native, contributing to the growth and success of a Y Combinator-backed startup.
- Implemented new features and functionalities, optimized application performance, and ensured seamless user experience across platforms.
- Collaborated with designers to integrate design ideas into the mobile and web applications, adhering to best practices and maintaining scalability.
- Architected and developed a transaction listing feature for the Payments module on the React Nave app, empowering users to access their financial data seamlessly.
- Integrated LivQuik's Card system on the web app, providing users with easy access to transaction history and card details.
- Successfully engineered multiple features on the web application using React, resulting in an 8x increase in user sessions.
- Seamlessly integrated multiple design ideas into the React Native mobile application, enhancing user experience while maintaining scalability
- Implemented social authentication options (Google, Phone, and Email), improving platform accessibility and user experience

Zydelo Inc.
Frontend Engineer

Mar 2021 - Jan 2022

- Architected and developed a comprehensive cross-platform mobile application using React Native, collaborating closely with clients to translate their vision into functional and user-friendly solutions.
- Streamlined the development lifecycle of the application for both iOS and Android platforms, ensuring efficient project delivery and adherence to client specifications.
- Proactively identified areas for improvement within ongoing projects, seamlessly integrating new features and functionalities to enhance developer experience and team efficiency.
- Successfully delivered a cross-platform React Native mobile application, meeting client expectations and exceeding quality standards.
- Fostered a collaborative and efficient development environment, resulting in increased team productivity and successful project outcomes.

Splitsub (YC W21)
Associate Software Engineer

Apr 2020 - Feb 2021

- Developed and launched two dynamic web applications using React.js, contributing to the growth of a Y Combinator-backed startup.
- Contributed to the development of a React Nave mobile application, adding new screens and features to enhance functionality and user experience.
- Implemented best practices and coding standards to minimize code complexity, promoting maintainability, and readability.
- Successfully launched two web applications from concept to delivery, showcasing proficiency in React.js and web development best practices.
- Effectively contributed to the evolution of a React Nave mobile application, expanding its feature set and improving its overall quality.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications

Majors: Software Development and Product Engineering

Pesto Fellowship

Pesto Tech, India

Majors: ReactJs, MongoDB, Node and ExpressJS

PROJECTS

Course Compass:

- Designed product architecture and developed **reusable** UI components leveraging **Tailwind CSS**
- Architected and integrated data store from scratch using **Firebase**.
- **Modeled data** structures on Firebase to support diverse **functionalities** across the application.
- Implemented social and email login integrations to enhance **user accessibility**.
